1. Regarding EP 814098, cited as "X" on the International Search Report, it is noted that while the reference broadly discloses hydrogenation of aromatic polymers using supported group VIII catalysts, no disclosure is made of the specific pore size distribution as required in the claims. In particular, the reference recommends and exemplifies the use of supports with substantially smaller pores (see pg. 5, lines 18-56, and preparation of example catalysts 1 and 2). No motivation can be found to modify the reference teaching to emerge with a method of hydrogenation of aromatic polymers which uses a catalyst comprising the support as required in the amended claims.
